TRADEMARKS

Paper No:10142005
Application No:10/691950
Filing Date:October 23,2003

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed. It should be brief but technically accurate and descriptive, preferably from two to seven words. See 37 CFR 1.72(a).

2. The drawings are objected to because the blank rectangular boxes and/or merely numbered boxes of figures 1,4 must be labeled. Conventional features disclosed in the description and claims, where their detailed illustration is not essential for a proper understanding of the invention, should be illustrated in the form of a graphical drawing symbol or a labeled representation (e.g., a labeled rectangular box). see 37 CFR 1.83(a). It is further pointed out that merely numbering the boxes is not considered an appropriate label. This allows identification of the drawing element without consulting the text of the specification. Correction is required.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

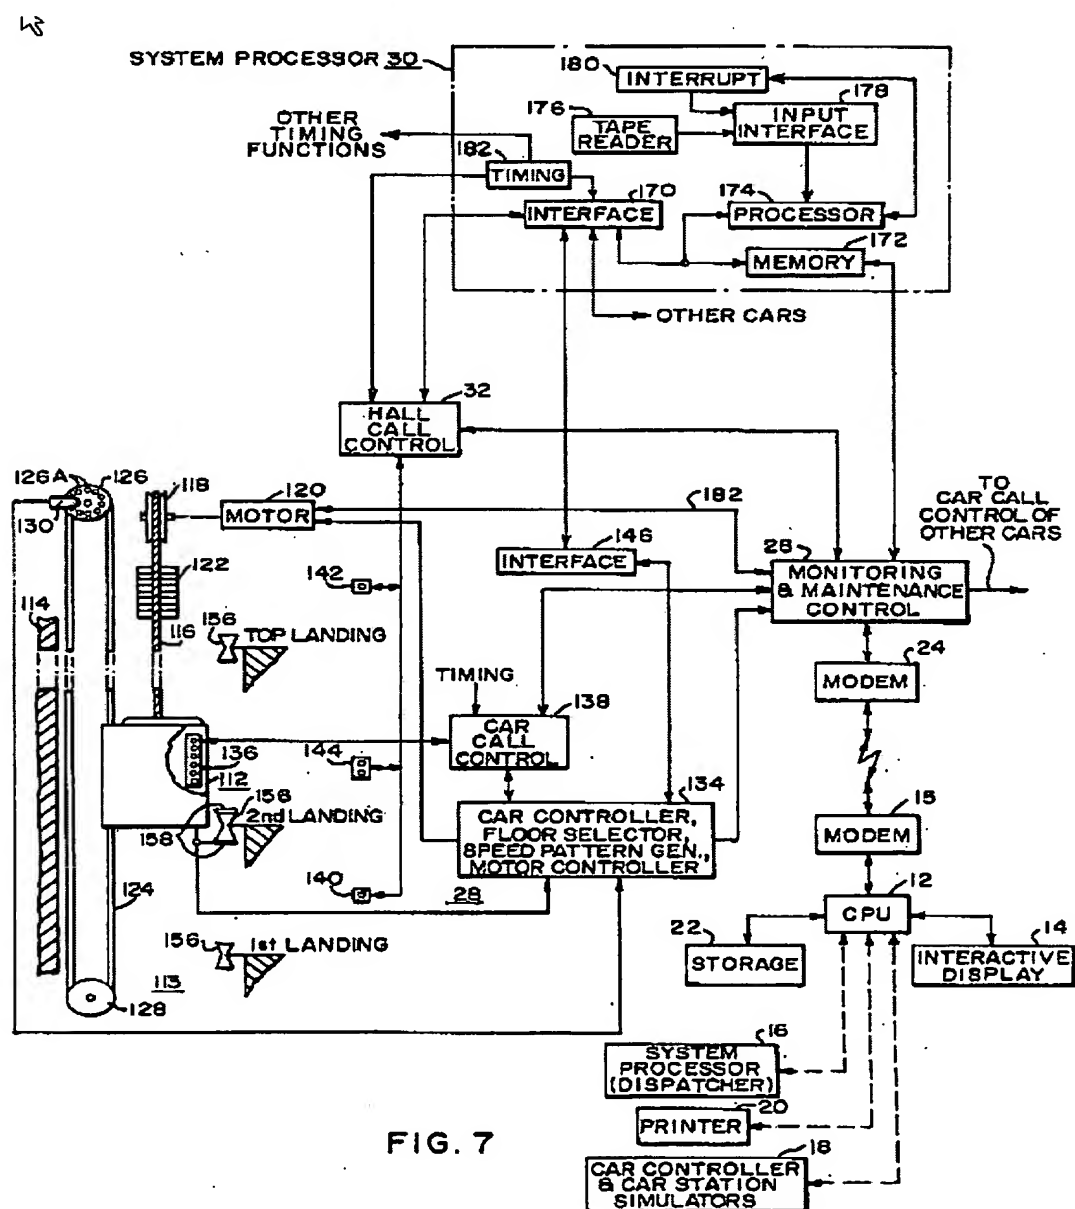

Art Unit: 2837

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-5, 11-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Hummert et al (3973648).

Hummert et al teaches in figures 1-9, a monitoring system for an elevator.

Art Unit: 2837

1,12) Elevator system 28 for multiple buildings A-C contain monitoring and maintenance control interface 26, which has inputs for control (figure 8) as well as sensor inputs (figure 9), which provides an output to modem 24 and over communications network to a remote cpu 12. Processor 30 (processor 174, memory 172) is associated with interface 26. Temperature 304 is one of the monitored elements.

- 2) System processor allows for programming.
- 3) System processor evaluates the selected sensor or function.
- 4) Transducers 302,304,306,308. Auxiliary inputs 250.
- 5) 252,298 S/P receiver and latch.
- 11,17) Controller 18, processor 16.
- 12,13) The sensors/controls are individually monitored and selected.
- 14) 15,24
- 15,18) Selection can be run during use.
- 16) The system provides remote diagnosis, repair among a few.
- 19) Monitoring can be scheduled.
- 20) 252,254.

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 6-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hummert et al. and applicants admitted prior art.

Hummert et al does not illustrate the specific details of the interface units but states that standard unit are utilized.

Art Unit: 2837

Applicant states on page 4 of the instant specification that the number and kind of interface units is variable and easily configured.

Thus, the particular type of interface is considered a matter of convenience.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Fried et al., Moore et al '442,'243, Otto et al and Asahi et al are cited to illustrate similar elevator monitoring systems with remote monitoring.

A shortened statutory period for response to this action is set to expire 3 months from the date of this letter.

Failure to respond within the period for response will cause the application to become abandoned. 35 U.S.C. 133
